***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Coleman (4,247,881). Coleman disclose a multi-layer ceramic capacitive device (10) comprising: a plurality of first electrode plates with a via (16) centrally located therein, the via having a first diameter, wherein the first electrode plates have a circular opening having a second diameter therein and wherein the circular opening surrounds the via; a plurality of second electrode plate with a via centrally located therein, the via having the first diameter, wherein the second electrode plates have a perimeter region of the plates removed and wherein the pluralities of first and second electrode plates are interleaved to form a capacitive stack; a first terminal (12) surrounding the perimeter of the capacitive stack and in electrical connection with each of the plurality of first electrode plates; and a second terminal in the via and in electrical connection with the plurality of second electrode plates. Regarding claim 2, wherein the capacitive device is generally squared-shaped, see Fig. 2. Regarding claim 3, the method of filling the via with solder is not germane to the issue of patentability of the device itself. Therefore, this limitation is considered but not given patentable weight. Regarding claim 4, wherein the second terminal is the via.

***Allowable Subject Matter***

3. Claims 5-7 are allowed.
